HIGH VOLTAGE[®]

VLF HIPOT INSTRUMENTS

**HVI – The World's VLF Source
Made in the USA**

90 countries served since 1998

- **Greatest Model Selection**
- **Highest Voltages Available**
- **Highest Power Ratings Delivered**
- **Only VLF Thumper Produced**
- **Rugged oil filled non-electronic design offers extreme reliability and ease of field service if ever necessary**
- **Latest solid state, computer controlled wireless designs offered**

HVI offers more models and higher voltage models than any other vendor in the world. Models range from 30 kVac – 200 kVac peak, offering from 0.4 μ F to 50 μ F of load capability. Load ratings shown below are at the lowest frequency.

Original Patented Transformer Based Design

VLF-30CM	0-30 kVac, 0.1 Hz, load rated to 0.4 μ F
VLF-4022CM	0-44 kVac, 0.1 Hz - 0.02 Hz, load rated to 5.5 μ F
VLF-50CM	0-50 kVac, 0.1 Hz - 0.01 Hz, load rated to 50 μ F
VLF-6022CM	0-62 kVac, 0.1 Hz - 0.02 Hz, load rated to 5.5 μ F
VLF-65CMF	0-65 kVac, 0.1 Hz - 0.01 Hz, load rated to 22 μ F
VLF-90CMF	0-90 kVac, 0.1 Hz - 0.02 Hz, load rated to 2.75 μ F
VLF-12011CMF	0-120 kVac, 0.1 Hz - 0.01 Hz, load rated to 5.5 μ F
VLF-200CMF	0-200 kVac, 0.1 Hz - 0.02 Hz, load rated to 3.75 μ F
VT33	VLF: 0 - 33 kVac, 1.0 μ F @ 0.1 Hz Thumper: 0 - 13 kVdc @ 760 Joules

Solid State Computer Controlled Models

VLF-34E	0-34 kVac, 0.1 Hz - 0.01 Hz, load rated to 5.0 μ F
VLF-65E	0-65 kVac, 0.1 Hz - 0.01 Hz load rated to 5.0 μ F

**The HVI VLF technology is protected
under U.S. Patent # 6,169,406**

Very Low Frequency AC Testers

AC testing of Cables, Motors & Generators is now easier than ever.

Since the introduction of the High Voltage, Inc. line of portable and affordable VLF hipots, there is a practical method of AC field testing highly capacitive loads, particularly cables and rotating machinery. High Voltage, Inc. offers a full line of VLF AC Hipots from 30 kVac to 200 kVac with models that can test up to 50 μ F of load, cables over 50 miles in length and the largest of generators or motors. Use VLF for **AC Withstand** stress tests and/or as a voltage source for **Tan Delta** and **Partial Discharge Diagnostic Testing**. HVI offers both its original, patented long proven oil filled power supply models with analog controls and its all new solid state, computer-micro controlled wireless design. Both have diagnostic accessories available.

SINCE 1998, HVI has produced the most economical, rugged, and reliable VLF products available. Our electro-mechanical control and our oil filled HV power supply designs are **extremely dependable**, and if necessary, more easily field serviced than the electronic designs. **The HVI design has a proven record with well over 2000 units in service worldwide.** The HVI VLF design offers the best of everything, with manual, easy to use controls but also sophisticated data collection. Electric utilities and industrials have long recognized the benefit of our technology. HVI knows how to build long lasting field test equipment. HVI now also offers the latest in solid state design VLF units that offer many benefits, like automatic programmable control and wireless communications.

All HVI VLF designs produce a **sine wave output** that meets the requirements of world standards, permitting it to be used as a voltage source for **Tan Delta** and **Partial Discharge** diagnostic testing. A sine wave producing VLF is required to perform these tests. Keep all options open by choosing a sine wave design, like the HVI VLF.

Why Buy HVI VLF Products?

- **HVI Design - Portable, Affordable, Rugged, Reliable, & Long Proven**
- **HVI Support & Service – Best Customer Support, Ship from Stock, Instant Factory Help Quick Service Turn Around, Repair & Cal. Locations Worldwide, Reps in over 90 countries**

What is VLF?

VLF stands for Very Low Frequency. A VLF hipot is an AC output high voltage instrument. HVI VLF products provide sinusoidal AC voltage but at 0.1 Hz - 0.01 Hz, compared to the 50/60 Hz output of conventional AC test sets. It is still an AC voltage with sinusoidal polarity reversals every half cycle. The VLF instrument is used to provide a simple go/no-go, or pass/fail, withstand test. Also, VLF instruments can be used as the voltage source for performing off-line **Partial Discharge** and **Tan Delta** cable diagnostic testing, both from HVI.

Why VLF?

VLF test sets are used to field test high capacitance loads like cables and motors/generators. The lower the frequency of an AC source, the lower the current and power required to apply a voltage to a capacitive load like a cable. At 0.1Hz, it requires 600 times less power to test a cable than at 60 Hz. The HVI VLF instruments permit users to field test long cables and large generators with a portable and affordable test set. A 100 lb VLF instrument can do the job of a multi-ton 60Hz AC test set. Cables should be tested with AC voltage. With the HVI VLF products, it can be done with a practical, economical, and easy to use package.

When and Where Is VLF Used – Cable & Rotating Machinery

The principal use of VLF is testing medium and high voltage shielded power cables. A long cable may have many microfarads of capacitance. To AC high voltage test this cable requires the use of VLF technology. An AC voltage test is the best way to verify the AC integrity of a cable. If a cable can't hold 2 – 3 times normal voltage, it is not healthy and an in-service failure is likely. Use the VLF to cause defects to fail during the test. Find the fault, make the repair or replacement, and be left with a better cable. It is especially valuable for **verifying a cable after installation or repair**: far better than using a DC hipot, 5kV megohmmeter, hot stick adaptor, or soak test, none of which provide meaningful information about a cables ability to

PEAK
KILOVOLTS

withstand several times normal AC voltage. IEEE 400, 400.2, & 433, VDE 0276, CENELEC HD 620/621, SANA 10198, NEN 3620 and IEC 60502-2 standards all define VLF testing.

VLF is also very useful for testing **large rotating machinery**, since it provides a portable and affordable method of field testing coils and is sanctioned by the IEEE 433-2009 standard.

Partial Discharge & Tan Delta VLF Cable Diagnostic Testing

The VLF hipot alone provides a withstand, or proof test. It can also be used as the voltage source for off-line **Partial Discharge** and **Tan Delta** cable diagnostic testing. HVI can serve the needs of the industry for cable and generator testing better than any other. Contact HVI for additional information on other cable testing methods and products available.

For more information on VLF testing, visit www.hvinc.com

Benefits of HVI VLF AC Hipots

- *Portable and affordable*
- *All models feature a true sinewave output*
- *Waveform is independent of load capacitance between 0.01 μ F and maximum load*
- *Highest load ratings available*
- *Highest voltage models available*
- *Simple and easy operation*
- *AC testing does not degrade good cable insulation*
- *Harmful space charges are not injected into the cable insulation*
- *No traveling waves are generated*
- *BNC scope output for waveform viewing*
- *Rugged and reliable design less prone to failure from transients*

Two Design Choices

Patented original, electro-mechanical, transformer designs and the latest solid state computer controlled designs available from HVI.

VLF-30CM(F) Best for testing 5 kV - 15 kV cables

Our smallest VLF model, the VLF-30CM approaches the size and cost of a DC hipot and is designed for quick & easy short-run cable testing. It can test up to 0.4 μF of load, about 4000 feet (1200 m) of a typical 15 kV class cable. Small, light, inexpensive, and easy to use. Now there's no reason not to use VLF.

Quick & Simple
15 kV cable testing
Low Cost
Easy to Use
Small & Light

Input: 120 volts, 60 Hz, 5 A peak, 2.5 A average
or 230 volts, 50/60 Hz, 3 A peak, 2A average (F suffix)

Output: 0 – 30 kVac peak, 0.1 Hz, sinusoidal

Duty: Continuous

Load Rating: 0.4 μF

Metering: Voltmeter: -30 kVac – 0 – +30 kVac
Charging Current meter: 0 – 50 mA peak

HV Cable Output: Shielded EPR output cable - 20 ft. (6 m)

Size & Weight: 15" w x 11.5" d x 22" h, 82 lbs. (88 lbs. - F version)
381 mm w x 292 mm d x 559 mm h, 39 kg
(42 kg - F version)

VLF-4022CM(F) Two piece portability for field testing 25 kV & 35 kV cables

This model, with its 44 kVac peak output, is suitable for all testing of 25 kV cable and Maintenance testing on 35 kV cable. Its high load capacity enables it to test up to approximately 10 miles of cable (at .02 Hz), depending on type. This model includes a charging current and load capacitance meter, and a center zero peak kilovolt output meter.

Two-piece easy portability
(see page 7)

Input: 120 volts, 60 Hz, 10 A peak, 5 A average
or 230 volts, 50/60 Hz, 6 A peak, 2.5 A average (F suffix)

Output: 0 – 44 kVac peak, 0.1/0.05/0.02 Hz sinusoidal

Duty: Continuous

Load Rating: 1.1 μF @ 0.1 Hz, 2.2 μF @ 0.05 Hz, & 5.5 μF @ 0.02 Hz

Metering: Voltmeter: Center Zero -45 – 0 – +45 kVac peak
Charging Current meter: 0 – 100 mA peak
Load capacitance meter: 0 – 6 Microfarads

Cable Lengths: Shielded RG/8U output cable - 20 ft. (6 m)
Interconnect cable - 10 ft. (3 m)

Size & Weight: Controls: 22" w x 11.25" d x 15.25" h, 50 lbs.
559 mm w x 286 mm d x 387 mm h, 23 kg
HV Tank: 14.5" w x 10.5" d x 19" h, 72 lbs.
368 mm w x 267 mm d x 483 mm h, 33 kg

VLF-6022CM(F) Two piece portability for testing up to 35 kV cable systems - Wind Farms

This model, with its 62 kVac peak output, is suitable for testing cables rated up to 35 kV. Its high load capacity enables it to test up to approximately 10 miles of cable (at .02 Hz), depending on type. This model includes an enhanced features package: a charging current and load capacitance meter, test dwell timer, and polarity indicating lights.

**Network Systems &
Wind Farm Model**

Two-piece easy portability

Input: 120 volts, 60 Hz, 15 A peak, 7.5 A average
or 230 volts, 50/60 Hz, 8 A peak, 4 A average (F suffix)

Output: 0-62 kVac peak, 0.1 Hz - 0.02 Hz

Duty: Continuous

Load Rating: 1.1 μF @ 0.1 Hz, 2.2 μF @ 0.05 Hz, & 5.5 μF @ 0.02 Hz

Metering: Voltmeter: 0 – 65 kVac peak
Charging Current meter: 0 – 100 mA peak
Load capacitance meter: 0 – 6 Microfarads
Settable test duration timer

Cable Lengths: Shielded EPR output cable - 20 ft. (6 m)
Interconnect cable - 10 ft. (3 m)

Size & Weight: Controls: 26" w x 13" d x 16" h, 75 lbs.
660 mm w x 330 mm d x 406 mm h, 34 kg
HV Tank: 15" w x 10.25" d x 21.5" h, 120 lbs.
381 mm w x 260 mm d x 546 mm h, 54 kg

All HVI VLF models are labeled and metered for peak voltage, not rms. When testing, use the peak voltage values given in your specification.

VLF-50CMF **Highest μF rating available: 5 μF - 50 μF @ 0.1 Hz - 0.01 Hz**

The **VLF-50CMF** is the highest power VLF unit we offer. It is rated for 5 μF at 0.1 Hz and can increase its output to 50 μF at 0.01 Hz, capable of testing up to **50 miles of 15 kV and 25 kV cable**. It is ideal for very long cable runs, like long feeders, wind farm applications, submarine cables, and others. It comes as pictured, including cable reels with 100' of high voltage and ground cable.

Input: 230V +/-10%, 50/60 Hz, single phase, 30 A peak, 25 A avg.
Output: Sinusoidal 0 – 50 kVac peak, 0.1, .05, .02 and .01 Hz frequency
Duty: Continuous
Test Capacitance: 5.0 μF @ .1 Hz, 10.0 μF @ .05 Hz, 25.0 μF @ .02 Hz, 50.0 μF @.01 Hz

Remove the wheels for van mounting.
 Simple installation – ready to go.

Kilovoltmeter: 3.5 in., 0 – 60 kVac peak 2% FS Accuracy
Current Load: 3.5 in., 0 – 200 mAac peak 5% FS Accuracy
Capacitance Meter: 0 – 6 μF with x1 & x10 ranges
Sizes:
 Controls: 17" w x 11" d x 9.5" h, 20 lbs.
 432 mm w x 280 mm d x 241 mm h, 9 kg
 Power Section: 20" w x 14" d x 27" h, 160 lbs.
 508 mm w x 356 mm d x 686 mm h, 73 kg
 HV Tank size: 13.5" w x 19" d x 23" h, 310 lbs.
 343 mm w x 483 mm d x 584 mm h, 141 kg
 Complete Trolley: 28" w x 60" d x 51" h, 775lbs
 711 mm w x 1524 mm d x 1295 mm h, 352 kg

Output cable length: Shielded X-Ray/Ground on reels - 100 ft. (30 m)

VLF-65CMF **Ideal for long 35 kV cable runs at Wind Farms**

The **VLF-65CMF**, 65 kV peak output, is a higher power model designed to test very long cables rated up to 35kV. It offers the complete controls package including Cable Burn mode. Its cable reels provide 100' (30m) of HV and ground

Input: 230 V, 50/60 Hz, 30A peak, 25A average
Output: 0 – 65 kVac peak, 0.1/0.05/0.02/0.01 Hz sinusoidal
Duty: Continuous
Load Rating: 2.2 μF @ 0.1 Hz, 4.4 μF @ 0.05 Hz
 11 μF @ 0.02 Hz & 22 μF @ 0.01 Hz

Metering: Voltmeter: 0-75 kVac peak
 Charging Current Meter: 0 – 200 mA peak
 Load capacitance meter: 0 – 6 microfarads
 User programmable test duration timer

Cable Lengths: Shielded EPR output cable – 100 ft. (30m)
 Ground cable 100 ft. (30m)

Sizes & Weight:
 Controls: 17" w x 11" d x 9.5" h, 20 lbs.
 432 mm w x 280 mm d x 241 mm h, 9 kg
 Regulator: 20" w x 14" d x 27" h, 160 lbs.
 508 mm w x 356 mm d x 686 mm h, 73 kg
 HV Tank: 15" w x 18" d x 22" h, 215 lbs.
 381 mm w x 457 mm d x 559 mm h, 98 kg
 Overall: 30" w x 60" d x 51" h, 704 lbs.
 on Skid. 762 mm w x 1524 mm d x 1295 mm h, 320 kg

VLF-90CMF **90 kVac voltage output yet still portable**

The **VLF-90CMF** offers 90kVac peak output voltage, suitable for testing cables rated 45 – 50kV. It is load rated for 0.55 μF @ 0.1 Hz, capable of testing up to 2 miles of cable, five times that at 0.02 Hz. Pictured with optional hand truck.

Input: 230 V, 50/60 Hz, 20A peak, 15A average
Output: 0 - 90 kVac peak, 0.1/0.05/0.02 Hz sinusoidal
Duty: Continuous
Load: .55 μF @ 0.1 Hz, 1.1 μF @ 0.05 Hz, 2.75 μF @ 0.02 Hz
Metering: Voltmeter: 0 – 100 kVac peak
 Current Meter: 0 – 100 mA peak
 Load capacitance: 0 – 6 microfarads
 User programmable test duration timer

Cable Lengths: Shielded EPR output cable – 20 ft. (6m)
 Interconnect cable - 10 ft. (3m)

Sizes & Weights:
 Controls: 26" w x 13" d x 16" h, 75 lbs.
 660 mm w x 330 mm d x 406 mm h, 34 kg

VLF-12011CMF 69 kV Cable Withstand & 115 kV Cable Diagnostics

The **VLF-12011CMF** provides a 120kVac peak output voltage, suitable for VLF hipot testing 69 kV cable and as a voltage source for partial discharge and tan delta testing of 115 kV cable. In addition to the standard controls described, this model also contains a Cable Burn mode. Cable reels provide 100' (30m) of HV and ground cable.

Input: 230 volts, 50/60 Hz, 30 A peak, 25 A average
Output: 0 – 120 kVac peak, 0.1/0.05/0.02/0.01 Hz sinusoidal
Duty: Continuous
Load Rating: .55 μ F @ 0.1 Hz, 1.1 μ F @ 0.05 Hz
 2.75 μ F @ 0.02 Hz, 5.5 μ F @ 0.01 Hz

Metering: Voltmeter: 0 – 120 kVac peak
 Charging Current Meter: 0 – 100 mA peak
 Load capacitance meter: 0 – 6 microfarads
 User programmable test duration timer

Cable Lengths: Shielded EPR output cable 100 ft. (30m)
 Ground cable 100 ft. (30m)

Sizes & Weight: Controls: 17" w x 11" d x 9.5" h, 20 lbs.

200 kVac

VLF-200CMF Highest voltage rating available

The **VLF-200CMF** provides a 200 kVac peak output voltage, suitable for performing VLF hipot tests on 138 kV cable and as a voltage source for tan delta and partial discharge testing on 230 kV cable. The controls offer all the features of our other VLF models along with VLF Cable Burning. Trailer mount optional.

Input: 230 V Single phase, 80 A peak, 50/60Hz
Output: 0 – 200 kVac peak, 100 mA. Bushing output – no cable provided
Load: .75 μ F @ 0.1 Hz, 1.5 μ F @ 0.05 Hz, 3.75 μ F @ 0.02 Hz
Duty: Continuous

Metering: Voltage: 0 – 200 kVac peak 3.5" analog display
 Current: 0 – 200 mAac 3.5" analog display
Controls: HV On/Off, Motorized Voltage Control, Zero Start Interlock, External Interlock, Digital Dwell Timer, Capacitance Measuring Circuit, Cable Burn Mode, Fixed 120% Overload, Automatic Data Logger

Size/Weight: Controls: 24" w x 25.5" d x 71" h, 650 lbs.

The Testing Service & Electrical Contractor Model

VLF Thumper

VLF: 33 kV @ 0.1 Hz @ 1 μ F
 Thumper: 13 kV @ 760 joules
 Burner: Alt. polarity discharge
 TDR/Radar: Ready to go.

VT33(F) VLF & Fault Locator Combo 2 tools in 1 box

The **VT33** is the worlds only combination VLF hipot and cable fault locator, or thumper. It is the complete tool for AC testing and fault locating cables rated up to 25kV. It offers a 33 kVac peak VLF output, VLF Cable Burn mode, and a 760 joule discharge output. It is fully TDR/radar ready.

Input: VT33: 120 V, 60 Hz, 10 A
 VT33F: 230 V, 50/60 Hz, 5 A

VLF Hipot Output: 0 – 33 kVac peak @ 0.1 Hz

Load Capability: 1 μ F – more than 1 mile (1.6 km) of 15 kV & 25 kV cable

Discharge Output: 0 – 13 kVdc @ 760 joules

Discharge Rate: Every 8 seconds

VLF Burner: Arcs cable every few seconds using cable energy to burn.

TDR Interface: Arc Reflection & Current Impulse

Size & Weight: 28" w x 26" d x 44" h, 245 lbs.

711 mm w x 660 mm d x 1118 mm h, 111 kg

Cable Outputs: 50' (15 m) shielded HV cable & ground

The "E" Series VLF Models Solid State Design - Fully Automated w/PC App - Wireless

The "E" Series of VLF products offer the latest in electronic design, with fully automated and programmable operation, data collection and reporting, and Tan Delta ready, all wirelessly controlled via custom software. There is no better VLF available. The two models shown below each have an optional **HVI designed Tan Delta** measurement accessory and **Partial Discharge** detection options are available from HVI and from others.

Cable Diagnostic Testing Accessories for all HVI VLF Models

HVI offers the accessories used for performing VLF Tan Delta and VLF Partial Discharge diagnostic testing for cables and rotating machinery. Some of the models offered are designed and produced by HVI and some are from other vendors, designed to function with the HVI VLF products. Other vendors also offer these accessories that may be used with the HVI VLF designs. **Models are available up to 200 kV peak.** Consult HVI for more details and refer to separate literature for each item.

Application Help and Field Test Scenes

Selecting a VLF Model

Considerations when selecting the right model: **voltage, μ F rating, μ F rating at 0.1Hz, & control features.**

Voltage: What is the cable voltage rating and what tests will be performed? Table from IEEE 400.2-2013.

Cable Rating	Installation	Acceptance	Maintenance
phase to phase	phase to ground	phase to ground	phase to ground
kVrms	kVrms (kVpk)	kVrms (kVpk)	kVrms (kVpk)
5	9 (13)	10 (14)	7 (10)
8	11 (16)	13 (18)	10 (14)
15	19 (27)	21 (30)	16 (22)
25	29 (41)	32 (45)	24 (34)
35	39 (55)	44 (62)	33 (47)
46	51 (72)	57 (81)	43 (61)
69	75 (106)	84 (119)	63 (89)

μ F Rating: VLF hipots are rated by the capacitance of the loads they can test. To select the right model, either the load capacitance must be known or the cable length if the μ F/km, μ F/ft, etc. is known.

μ F Rating at 0.1 Hz: If the VLF is to be used as a voltage source for performing Tan Delta and Partial Discharge testing, the load rating at 0.1 Hz is important, as this is the frequency most used for these tests. In some cases, 0.05 Hz frequency can be used. If the VLF is to be used for hipotting, then any frequency can be used.

Control Features: Are the automated, laptop controlled, etc. features of the "E" Series necessary or are the basic manual controls of our original design adequate, saving money and gaining other benefits?

Comment: A fifth consideration could be the vendor? Where it is made and serviced, how available is it, how quick is the service turnaround, and what is the vendors reputation. All HVI products are **Made in the USA** and most are in stock.
